The Shadow Ku-Band VSAT is a flat panel Very Small Aperture Terminal (VSAT) providing high-speed data for Internet, Video and VPN connectivity. The terminal is designed for ease of transport and missions requiring inconspicuous travel, fitting easily into a backpack or laptop-sized and is light enough to be stowed in a commercial airline's overhead compartment. Integration of the modem, RF components and antenna into a single assembly greatly reduces setup to operational time to less than five minutes. The embedded ViewSat-e GUI, integrated GPS and compass simplify the satellite pointing process.
